

INTRODUCTION

The following pages reflect a substantial modification to the Vermont Incident Based Reporting System (VIBRS) codes. The codes changes, additions, and deletions were made to reflect user needs and to bring about a more consistent and accurate reporting of the statistical data that is essential to all law enforcement agencies in the State of Vermont. **A complete index of these codes is available below.**

For members of the Vermont State Police, the VIBRS code changes coincide with the introduction of a series of new investigative report forms mandated for use in the field. These new investigative forms are specifically designed to enhance the capabilities of the Spillman reporting system by efficiently capturing data in the field for entry into this computerized database.

INSTRUCTIONS

- Each incident may have multiple Offense Codes stemming from the single incident. For example, a response to a property damage accident (3200) may result in the seizure of a misdemeanor quantity of marijuana (1822) and an arrest for DUI (2115). Up to ten (10) VIBRS codes can be entered into this field, in no particular order.

Each incident can only have one (1) Observed Code. The VIBRS code must reflect the most significant component of the incident, and not necessarily the lowest code number which has been past practice by many. In the example above, the most significant component of the incident would be the DUI arrest, therefore, the VIBRS code 2115 would be entered in the Observed Code field. If the marijuana seizure was a felony, this would be reflected as the significant component in connection with the incident.

Circumstance Codes	Description	OFF Code	Offense Description
ATTM	ATTEMPTED	0099	Consent Search
ALCO	ALCOHOL		
APO	Abuse Prevention Order	0100	Death Invest - Undetermined
		0101	Homicide/Murder
